Professional Summary

Motivated and detail-oriented IT student at the Tshwane University of Technology with hands-on experience in Java programming, networking fundamentals, and cybersecurity principles. Passionate about building real-world applications, solving technical problems, and strengthening system security. Skilled in Java AOP, basic network configuration, and security monitoring concepts. A fast learner with strong analytical abilities, eager to grow into a Junior Java Developer, Network Technician, or SOC Analyst role while continuously developing technical and professional skills.

Education/Skills Training

Diploma in Information

Technology – Tshwane

University of Technology

(TUT) Soshanguve

campus Expected

completion: June 2026

Subjects: Computer Networks, Programming, Computer Security, Virtual Machine, Operating System, Discrete Mathematics, Computer Architecture, Information literacy, Network Management, Wireless Networks.

Practical Experience / Learnership

Business Technical Support Learner | Umuzi

Nov 2025 – May 2026 | Remote

- Developed teamwork, communication, and problem-solving skills.
- Learned to document solutions and follow IT procedures.
- Assisted with basic IT support and troubleshooting for learners and staff.

Umuzi.org

Technical Business Support Freelancer (Independent Contractor)

May 2026 – Present | Remote

- Delivering project-based technical business support tasks in a structured remote freelancing environment.
- Supporting client and partner deliverables through data handling, technical troubleshooting, and IT-related assignments.
- Collaborating remotely with teams to complete structured digital work within deadlines and milestones.
